OBERON TECHNOLOGIES TO PRESENT AT THE SUMMER XML 2009 CONFERENCE

Ann Arbor, MI, July 3, 2009 — Oberon Technologies, provider of automated publishing and XML-based software solutions, is scheduled to present at this year's Summer XML 2009 Conference in Raleigh, North Carolina. The conference will take place July 27th through July 28th and will feature many of the industry's foremost authorities on XML technologies as well as many of the world's leading suppliers of XML-based software and services.

Oberon Technologies' presentation, "Leveraging your XML Content: Developing Stylesheets for Personalized Multi-Channel Publishing," will focus on the use of stylesheets and transformations to leverage XML content across entire enterprises. Attendees will be shown how to use their existing XML content to create new products by exposing their information through different channels. This will include discussion on how to leverage XML content from various sources and then using XSL to transform that data to outputs such as: web, wireless devices, PDF, CDROM/DVD as well as major composition products such as Arbortext, Adobe, Quark, Open Source, and others.

"Our goal in this session is to help companies understand how they can leverage their information more effectively while lowering the cost of creating and developing content," said Scott Youngblom, co-owner of Oberon Technologies.

"Leveraging your XML Content: Developing Stylesheets for Personalized Multi-Channel Publishing," presented by Tim Allen and Scott Youngblom, co-owners of Oberon Technologies is scheduled for July 27th from 2:45pm to 4:00pm.
